SIBA HIGH-TECH MECHANICAL GROUP JOINT STOCK COMPANY

SIBA GROUP INTRODUCTION

Siba High-Tech Mechanical Group Joint Stock Company (Siba Group) was established in 2015. The company is a multi-industry manufacturing and business enterprise, evolving on the foundation of the mechanical engineering and construction sectors. The three main areas of operation for Siba Group:

- Construction mechanics (SIBACONS).
- Agricultural mechanics (SIBAGRI).
- Environmental mechanics (SIBAECO).
- Industrial mechanics (SIBAINDUS).
- Furniture and refrigeration (SIBA Furniture & Refrigeration).

SIBAINDUS
Next-Gen Fabrication Solutions

OUR VISION

To become Vietnam's leading high-tech mechanical group, providing a variety of modern products and solutions for life and production.

MISSION

- Make a positive contribution to the development of the supporting industry in Vietnam.
- Contribute to the development of renewable energy, biomass energy, and national clean energy.
- Create a green, clean, and sustainable living environment for the community and society.

SIBA GROUP CORE VALUES

Siba Group sets forth 03 core values:
HEART – MIND – SPEED as guiding principles
for all activities of the Group:

HEART: Wholehearted
dedication, from a pure heart.

MIND: Application of knowledge,
elevating value.

SPEED: Anticipating opportunities,
executing with lightning speed.

NETWORK OF FACTORIES

The high-tech mechanical factory network of Siba Group is distributed across various provinces and cities in Vietnam, including Bac Lieu, Ba Ria-Vung Tau, the Central region, and the Northern region.

TARGET MARKET

Understanding the specific requirements, industry standards, and delivery timelines of customers in each target market, Siba can develop a comprehensive and well-informed market entry strategy, maximizing its chances of success in these target markets.

ISO 9001 | ISO 14001 | ISO 45001 CERTIFICATE

Siba Group was inspected and recognized for meeting international quality standards
ISO 9001:2015 – Quality management systems
ISO 14001:2015 – Environmental management systems
ISO 45001:2018 – Management systems of occupational health and safety

MANAGEMENT TECHNOLOGY **SAP SYSTEM**

Siba has successfully implemented SAP- a leading ERP system, across many industrial manufacturing operations.

This is a comprehensive solution suitable for manufacturing companies. All of the company's operations and activities will be integrated into a single system, and data will be logically systematized. With high-speed analysis capabilities, it allows for rapid collection and processing of data.

OUR SERVICE

We carry an advantageous industry position with both size and scalability, experienced staff and engineers, modern fabrication technology, and automation that'll help both projects' bottom line and timeline.

Some of our capabilities include: tower-fed fiber lasers, robotic and manual welding cells, automated punching & stamping machines, automated panel benders, CNC multi-axis press brakes, in-house powder coating, machining, finishing, and assembly.

MACHINERY EQUIPMENT

Siba Group owns a network of high-tech mechanical engineering plants equipped with a system of modern machinery and equipment imported from Europe.

Automated Salvagnini Italy Steel Plate Fabrication Line MV + SMD + S4 + MCU + PCD + RIP + P4 + SAP

Salvagnini Flexible Smart Line (MV + SMD + S4 + MCU + PCD + RIP + P4 + SAP)

Our Salvagnini Flexible Smart Line integrates fully automated sheet loading, punching-cutting, sorting, rotation, and panel bending into one continuous flow. With the MV and SMD storage system, high-speed S4 Punch&Cut center, MCU dynamic buffering, PCD sorting, RIP turnover, and the universal-tool P4 panel bender, the line enables true JIT production with seamless changeovers and zero re-tooling.

This configuration minimizes WIP, reduces handling, improves material yield, and ensures consistent, high-precision panels. The result is a highly efficient, fully automated fabrication process that delivers fast throughput, high repeatability, and superior product quality.

Salvagnini L3 - High Dynamic Fiber Laser Cutting

The L3 fiber laser cutting systems with electronic sources deliver reduced running costs and eliminate both optical path and laser gas. They feature an airplane-type structure that confers solidity and precision, and a head with a single optic for high-quality cutting over the entire range of materials.

B3 - Press Brake Salvagnini - Italy

B3 press-brake range delivers high degrees of productivity, accuracy and safety yet keeps consumption low. The high-dynamic (direct-drive) and KERS energy recovery systems achieve higher speeds and accelerations with the same consumption.

The ATA device installed on the B3 press-brake allows tool length to be changed and adjusted automatically, making bending of both batch one and parametric parts possible.

INDUSTRIES SERVED

With a focus on innovation, quality, and customer satisfaction, Siba Group is well-positioned as a trusted partner for companies seeking reliable, high-performance OEM sheet metal fabrication.

FURNITURE & HOUSEHOLD APPLIANCES

Siba Group has experience manufacturing finished furniture and household appliances for members and partners within our business group.

Our product series includes a wide range of steel furniture.

In addition to our product series, we also offer ODM and OEM services to cater to the unique requirements of our clients.

PIG BREEDING FARM FABRICATION

Siba has established a dedicated pig breeding farm as part of our industrial operations.

This allows our partner to raise and breed pigs for various commercial and agricultural purposes, including specialized housing, automated feeding systems, climate-controlled housing, disease prevention protocols, and other advanced techniques.

Siba's expansion into pig farming fabrication further demonstrates our diverse industrial manufacturing expertise and willingness to venture into adjacent sectors, strengthening our overall business resilience and market positioning.

ELECTRIC CABINET & SERVER RACK

Siba has the capability to produce OEM electric cabinets and server racks. This includes both OEM the structural sheet metal components as well as the fully assembly.

These expanded manufacturing capabilities allow us to serve a wider range of industries and customers.

OEM PROJECT

Siba has the capability to produce wide range of OEM product, including machine frame, pallet, etc. This includes both OEM the structural sheet metal components as well as the fully assembly.

HVAC SYSTEM

Siba's OEM HVAC division employs a team of experienced mechanical engineers, HVAC specialists, and production technicians. They utilize the latest 3D modeling and simulation software to design efficient, high-performance HVAC systems tailored to each customer's requirements.

The company's manufacturing facilities are equipped with advanced fabrication tools and quality assurance processes to ensure the production of durable, reliable HVAC equipment.

Key areas of expertise within Siba Group's OEM HVAC offerings include:

- Custom air handling unit (AHU)
- Chiller and cooling tower systems
- Ventilation and air distribution equipment
- Building automation and control integration
- After-sales service and technical support
